

Position Opening: Software Engineer

SN&N Electronics, Inc. has an opening for a Software Engineer position to build medical products. The successful candidate will develop and debug scripts for medical applications using Julia programming language and assist firmware developers in software testing and documentation. SN&N Electronics has pioneered product development that has helped companies from a vast array of science and tech industries to engineer their ideas from concept to creation. We invite qualified engineers to join the SN&N team!

Responsibilities:

- Design, architect, and test Julia scripts
- Design Julia based GUI application
- Design algorithm to control electromechanical system
- Familiar with python scripting
- Write documentation for specification, architecture, and testing
- Assist software developers and electrical engineers in other project-related tasks
- Good writing skills to document code as per company protocol
- Ability to work independently and with a team

Minimum Qualification:

- BS/MS degree in EE/Computer Engineering/Computer science or related technical field
- Julia coding and debugging skills
- Submit a sample project written in the Julia/python programming language
- Has a natural curiosity for learning new skills, possesses a positive attitude, is detail-oriented, and is a team player
- In possession of appropriate paperwork to gain and maintain employment in the US

Work Location: San Jose, CA

Compensation: DOE
